

# Tiara Yancey | Full Stack Developer

[tiarayancey0@gmail.com](mailto:tiarayancey0@gmail.com) | [LinkedIn](#) | [GitHub](#)

## SUMMARY

Full Stack Developer with a strong grasp of IT methodologies, web development, scripting languages for object-oriented programming, and SQL/NoSQL databases. Proficient in writing queries and working with REST APIs to retrieve and manipulate data.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, Node.js, TypeScript, HTML5, CSS, SQL/NoSQL | **Frameworks/Libraries:** React, Flask, Express, JQuery, Bootstrap | **Databases:** MySQL, MongoDB, Mongoose, GraphQL | **Tools:** AWS, Git, GitHub, Postman, Amplify, MS Office, GSuite | **Skills:** Teamwork, Attention to detail, Customer Service, Continual Learning

## TECHNICAL PROJECTS

**Movie App:** Post your favorite movies with comments using Python Flask | [GitHub](#)

- Data Security: Implemented Bcrypt and hashing techniques to encrypt user passwords, ensuring data security.
- API Integration: Successfully integrated a Movie API for dynamic movie information display.
- Database Expertise: Established one-to-many and many-to-many models using MySQL, facilitating user-driven movie collections and comments.
- Validation and Version Control: Employed backend validations for consistent data handling and demonstrated Git proficiency, including branch management and conflict resolution.

**Trade Lace:** Sneaker App where you can trade shoes using React and MongoDB [GitHub](#)

- Interactive UI: Utilized Bootstrap, HTML5, and CSS to create responsive, visually appealing user interfaces and engaging layouts.
- Workflow Design: Collaboratively designed wireframes and workflows using Mockplus, ensuring a seamless development process.
- Data Integrity: Applied backend validations for maintaining data consistency and employed RESTful web services for efficient data communication.
- Git and MongoDB: Demonstrated Git proficiency for version control and MongoDB expertise for robust database management and storage.

## PROFESSIONAL EXPERIENCE

**Warehouse Associate** | Home Depot | Locust Grove, GA

Mar. 2021-  
Present

- Leveraged technology tools like handheld scanners and inventory software to maintain inventory accuracy, minimizing discrepancies.
- Efficiently process customer orders, aiming for a high number of orders picked and packed per hour while ensuring accuracy
- Two Associate Homer Awards for excellent customer service, hard work, and attention to detail
- Performance was over 178% for 5 weeks

**Walmart Associate** | Walmart | Locust Grove, GA

Feb. 2020 -  
Dec. 2022

- Conducted thorough inspections of received goods, utilizing barcode scanning technology to verify product quality and minimize discrepancies
- Perform regular inventory audits and cycle counts, leveraging inventory management software to identify and rectify discrepancies, contributing to accurate stock levels and minimizing losses.

## EDUCATION

**Coding Dojo** | Full-Stack Developer Certificate in Python and MERN

Jan. 2023 - July 2023

- Participated in an intensive, immersive bootcamp experience where I was tasked with the completion of weekly deliverables and projects totaling 25-30 hours of weekly programming.
- Expanded my knowledge and expertise of computer science, data structures, algorithms, and built several full-stack projects using languages such as Python and JavaScript with fluency in frameworks/libraries such as Flask and React.
